RULES AND REGULATIONS FOR BULK WATER SALES

The Town of Berthoud permits the use of fire hydrants for bulk water sales to the general public subject to the provisions contained in the Rules and Regulations for the Town of Berthoud.

1. An individual or entity that desires to purchase bulk water from a Town of Berthoud fire hydrant shall contact the Town to make arrangements for pick-up of a hydrant meter and backflow prevention device when appropriate. The customer shall sign the standard form of Agreement for Use of a Fire Hydrant for Bulk Water Sales.
2. Any container, tank, or tanker used for transportation of bulk water shall be equipped with an “air gap” or other appropriate backflow prevention device in any bulk water sale situation.
3. The customer shall pay a cash deposit at the time of pick-up of the Town equipment in the amount established by the Town. The customer shall pay for all water used from the Town’s system at the rate established by the Town.
4. The deposit may be refunded after the hydrant, meter and backflow device have been inspected/tested by a Town representative. If the hydrant, meter or back flow device is damaged or misused, the cost of the repairs will be deducted from the deposit. If the deposit is insufficient to cover the expenses, including water used, the customer shall pay the difference.
5. All water purchased by the customer shall be used within the combined boundaries of the Town of Berthoud; and the customer shall swear under oath that such will occur.
6. Bulk water customers shall follow all Rules and Regulations adopted by the Town of Berthoud.
